More than one in four subscribers never make it to week forty.

€1.73M in lifetime revenue. Lost to churn.

The scope of the problem, in three numbers.

COHORT SIZE

5,000 subs

Synthetic dataset modelled on meal kit subscription behaviour. Avg tenure 53.8 weeks · Avg NPS 58.8.

DATASET CHURN

28.2%

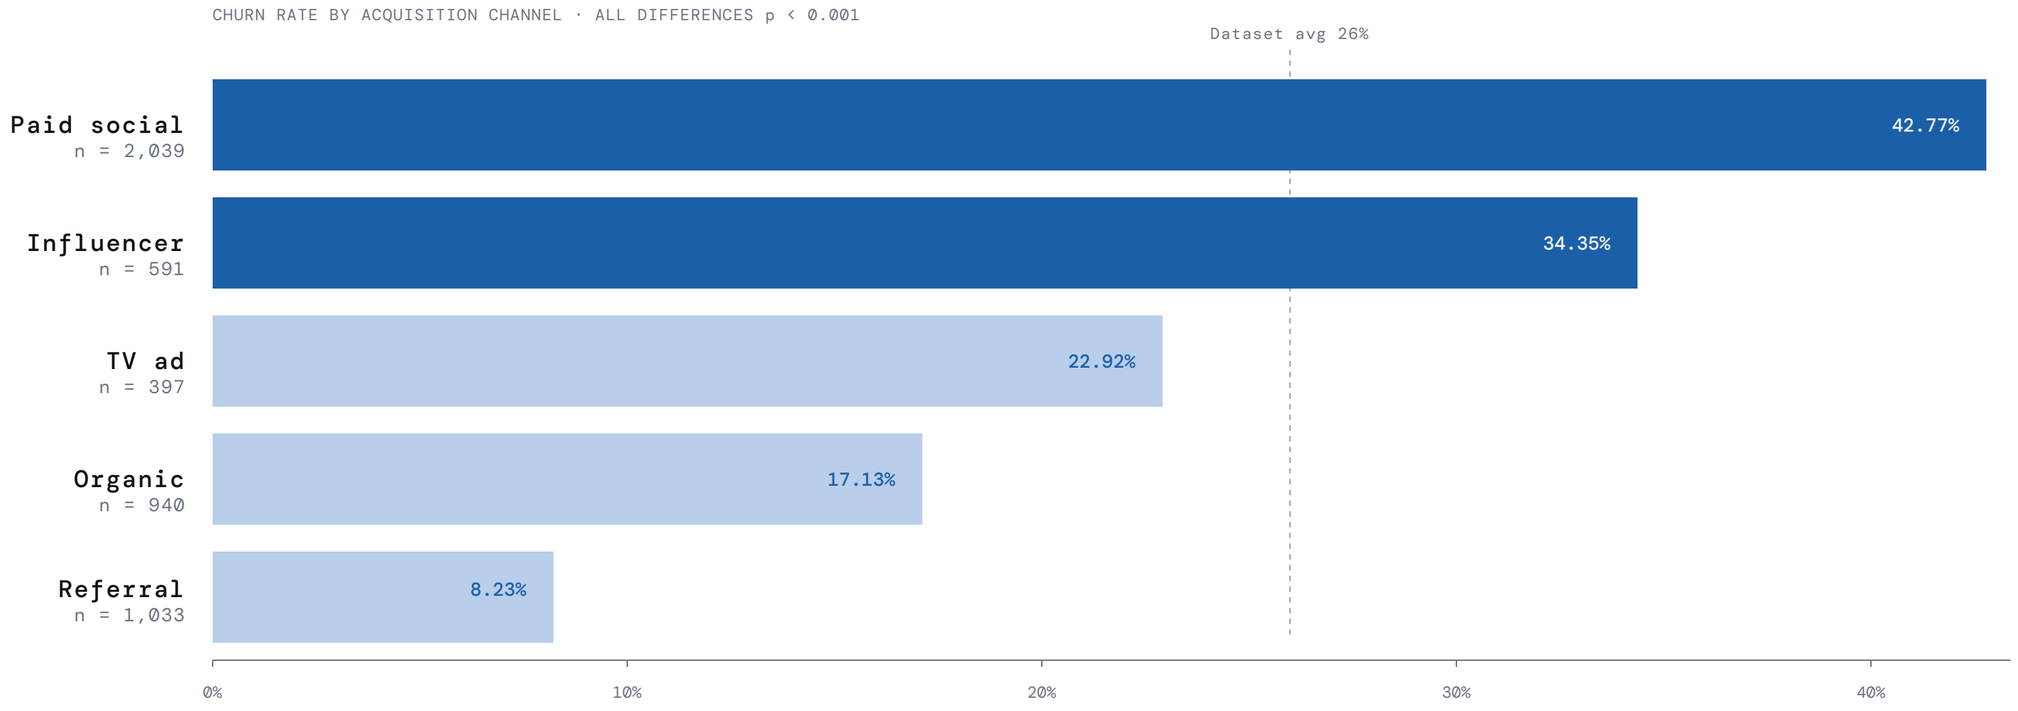
1,412 subscribers lost. Churned LTV €1,375 vs active LTV €2,603.

REVENUE LOST

€1.73M

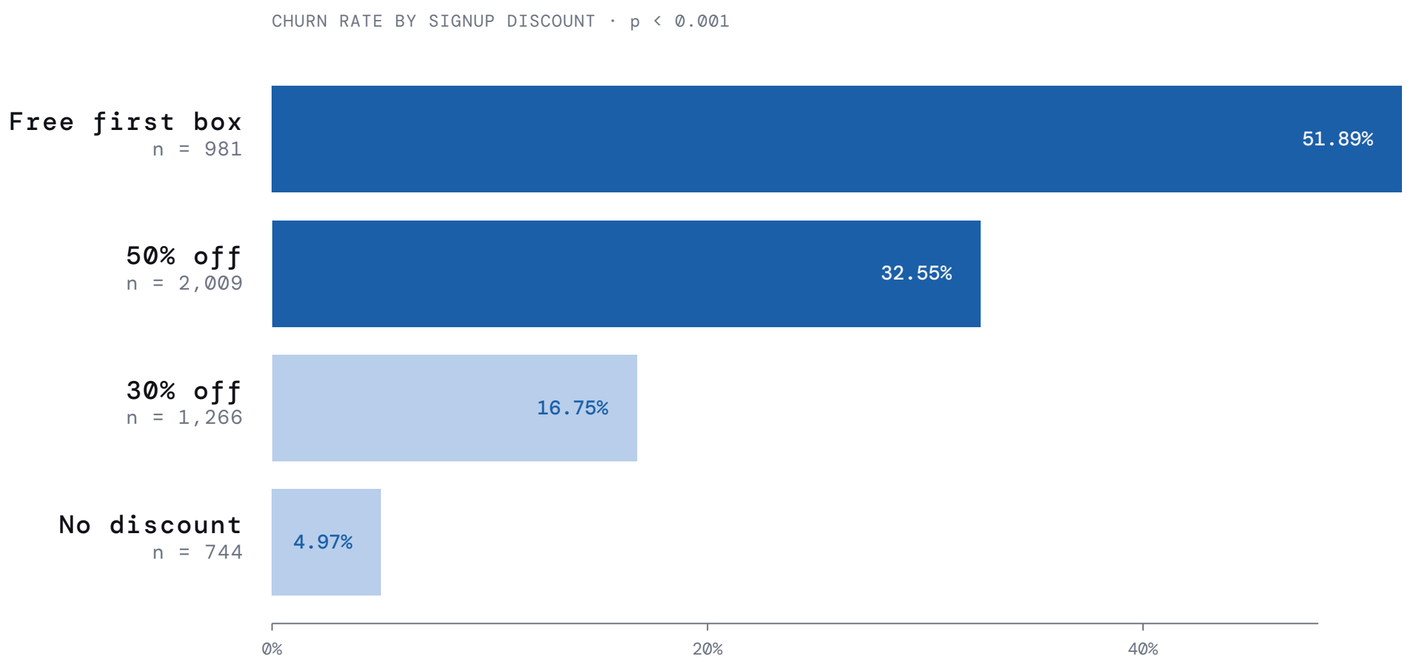
Every churned subscriber costs €1,228 in LTV. Across 1,412 lost customers, that adds up.

Paid social is five times more likely to churn than referral.



N = 5,000 · LTV GAP: €2,954 REFERRAL VS €1,754 PAID SOCIAL = €1,200 PER CUSTOMER

Free first box subscribers churn at 52%.



THE LTV GAP:

FREE FIRST BOX LTV

€1,492

FULL-PRICE LTV

€2,987

GAP · 981 FREE-BOX SUBSCRIBERS

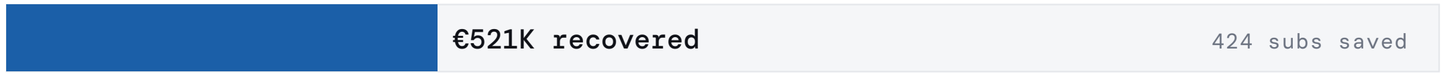
RECOVER 30% OF CHURNERS



HOW WE COUNT RECOVERY

Recovery value = additional lifetime value per saved customer (€1,228) × subscribers saved.

Calculated as active customer avg LTV (€2,603) minus churned customer avg LTV (€1,375). Modelled assumption. Validate through controlled retention experiments before budget commitment.

EVEN 10% RECOVERY GENERATES €173K IN ADDITIONAL LTV.

Four risk tiers.
Four interventions.

TIER 1 CRITICAL	TIER 2 HIGH	TIER 3 MEDIUM	TIER 4 LOW
67.7%	37.5%	14.0%	2.6%
CHURN RATE · N = 1,094 (22%)	CHURN RATE · N = 1,302 (26%)	CHURN RATE · N = 1,012 (20%)	CHURN RATE · N = 1,592 (32%)
LTV €949	LTV €2,018	LTV €2,667	LTV €3,088
INTERVENTION	INTERVENTION	INTERVENTION	INTERVENTION
Personal outreach within 48h. Pause or discount offer.	Automated discount on next delivery. Monitor weekly.	Personalised email. Referral nudge.	Referral programme. Our strongest acquisition channel.

RISK SCORE = SKIP >10% + SUPPORT ≥2 + DELIVERY ≥2 + PAUSED ≥2 + WEEKS <40

Three moves, in order of leverage.

01 / FREE FIRST BOX

Evaluate the free first box strategy.

Subscribers on this offer churn at 52% with €1,492 LTV vs €2,987 at full price. The €1.47M gap warrants a controlled test of alternative entry offers.

02 / RISK MODEL

Act when the risk score flags a subscriber.

Our five-signal model identifies Critical and High tier customers early. Automate interventions in the first 40 weeks. Target recovery: €173K–€521K.

03 / ACQUISITION

Shift 10% of paid social budget to referral.

Referral churns at 8% vs paid social at 43%. That shift is worth +€1,200 LTV per converted customer.
